Next Geosolutions Ref: PLC-IMS-01-LTD

Revision No.: 1

Date: 08/03/2019

Description: Issued for Use

Issued by: QHSE

Reviewed by: COO

Approved by: CEO

Next Geosolutions is an international turn-key geoscience and engineering service provider, operating in the energy, infrastructure & utilities markets, and offering a wide range of technical support services, science and technology in the fields of industrial oceanography activities and marine science. Consolidated operative region is EMEA, while the Organisation is capable and structured to deliver services in other areas of the globe.

Next Geosolutions aims to continually succeed with the best possible economical and financial KPI's, integrating the business model with an enhancement of a total satisfaction of the Client through a careful management of activities and the provision of services of the highest Quality standards, with the utmost regard to the safeguard of people's Health and Safety and the care of Environment.

In order to achieve all these goals, Next Geosolutions implements an IMS which, with regards to the aspects of Quality assurance and control, is within the scope of ISO 9001:2015 standard, according to the following business committed principles:

- Pay extreme care to any Client's need, requirement and expectation, as well as to applicable statutory requirements, ensuring they are understood and satisfied;
- Focus on 'process-based' and PDCA approaches, adopting a risk-based thinking, with risks and opportunities to be addressed and on an 'evidence-based' decision making;
- Establish, document, monitor, review, update measurable objectives needed to guarantee the continual improvement of the IMS;
- Inform, motivate, encourage and involve all personnel in relevant Quality matters, making sure that policies, objectives and responsibilities and all the knowledge worth/required to be shared are well communicated and understood within the Organisation, at all levels;
- Promote and keep a friendly and stimulating working environment, encouraging co-operation and team spirit, and taking into consideration each personnel inclination, skill, competence and aspiration, consistently with the Organisation's structure, procedures and objectives;
- Take care of the continual improvement of the Organisation by promoting Research & Development programs, partnerships, agreements and joint-ventures aimed to the execution of complex and multi-disciplinary projects, innovation and technological upgrading, all the above summed, in other terms, as improvement of our Organisational Knowledge, a value, an asset;
- Work with partners and external providers which, in intents and business conduct, are communicated about and agree with requirements and programs of enhancing quality and Client satisfaction and on such a basis develop a collaborative relationship;
- Arrange and implement an adequate and effective internal audit program, both in the offices and, as far as practicable, at the worksites.

While CEO is ultimately accountable for the IMS, COO is the function designated and assigned the responsibility and authority for ensuring the promotion of Client focus and that the Organisation's processes are delivering their intended outputs. QHSE Manager is, among other Organisation's functions, the one designated and assigned the responsibility and authority for ensuring that the IMS conforms to the ISO 9001:2015 requirements, IMS integrity is maintained when a change is applied, and for reporting on IMS performance and opportunities of improvement.

CEO, Giovanni Ranieri
